# A Profile of Tri-Boro

Since its inception, Tri-Boro has been dedicated to providing companies with innovative solutions, equipment and programs for all their storage requirements.

## *Our Product Lines Include:*

**SHELVING • PALLET RACK • RIVET-RAK™  
SERVICE CARTS • WORK BENCHES • SHOP DESKS  
SPECIALTY RACKS • AND MUCH MORE!**

From the largest to the smallest of jobs, our production, warehousing/shipping and customer service departments insure that your order will be delivered on time.

All Tri-Boro products are manufactured in accordance with the highest quality standards of the material handling industry. In the past and into the future - quality, economy, customer service, and attention to detail are the combination of strengths that have kept and will keep Tri-Boro growing.

New and expanded product lines such as our Tall and Heavy Duty Shelving Posts, Rivet-Rak Z Beam and Tri-Boro Pallet Rack are included in the pages to follow.

***Made with Pride in America***

The Tri-Boro Corporation has been in continuous business for over 70 years.

The current ***Tri-Boro Storage Products Company*** has been under the same ownership since 1971.

The Tri-Boro catalog is lovingly dedicated to the memory of Frederick DeMaio Jr., the founder and owner of Tri-Boro Shelving and Tri-Boro Storage Rack.

Mr. DeMaio served his country honorably in the U.S Army and was later appointed to the New York City Police Department in 1956. He served with distinction and valor and upon his retirement from the NYPD, he embarked on a 49 year business career as a manufacturer of storage systems located in New York and Virginia. He also served as Vice Chair and Chairman for many years in the Material Handling Industry's SMA product trade association group.

Fred was extremely proud of being an American manufacturer that steadily grew his business and expanded when others in the industry down-sized, sold or otherwise closed their doors under economic pressure. Fred was known to say: "I love watching things grow" and "My word is my bond".

His legacy will be felt by his family, friends and industry professionals for years to come.

# Tri-Boro Shelving Features

Tri-Boro Shelving is manufactured in the widest range of sizes available in the industry. When used in combination this array of sizes can meet the most demanding of custom applications.

The flanged shelf is manufactured from cold rolled steel and has "Triple Bends" on all four sides for incomparable strength.

**Standard shelves are manufactured in 24", 30", 36", 42" and 48" widths, and 9", 12", 15", 18", 24", 30" and 36" depths.**

All Tri-Boro steel components receive a rust resistant phosphatized cleaning for better paint adhesion and durability. A custom, quality blended powder coat paint is applied "Electro-Statically" and then baked on in a continuous curing oven for lasting durability and outstanding appearance. This process is the latest innovation for the integrity of paint surface and the protection of our environment.

## STANDARD FINISHES

Tri-Boro's standard finish is Gray. However, all colors shown are available for a small additional charge. The choice of an alternate color may create a slight delay in delivery.

## SHELF TYPES

### Flange Shelf

**Class 0 – No Re-Bar**

**Class 1 – 1 Re-Bar**

**Class 2 – 2 Re-Bar**

**Flange Shelves** are available in both 20 GA. and 18 GA. material thickness. Class 0 is designed for applications that do not require extreme load bearing strength.

The addition of 1 Re-Bar will increase bearing strength by about 50%. The addition of 2 Re-Bars will increase the bearing strength by over 100%. Please see the chart on page 7 for exact load bearing strengths.

### Boxer Shelf

**Boxer Shelves** are constructed of 22, 20 or 18 gauge steel with full welded box formation in front and back of the shelf and have formed channels on both ends. All corners are lapped and welded for additional strength.

The box formation is welded on a 6" center minimum to provide integrity the entire length of the box. All shelves have a box profile height of 1-1/4". All box shelves accommodate either clip or nut and bolt connection to the upright. Please see the chart on page 7 for exact load bearing strengths.

Tri-Boro's "Boxer"™ industrial grade steel shelving features a welded tubular box design with lapped and welded seam corners.

## POST TYPES

**Tri-Boro manufactures rigid roll formed "Box" and companion "Offset Angle" type posts.**

The box post provides unobstructed shelf access. One box post takes the place of two angle posts at the front of a shelving unit.

The offset angle post reduces shelf accessibility by 1 inch per end, although the field length is nominal to the dimension ordered.

Box style post heights range from 3'1" to 11'3". Offset Angle heights range from 3'1" to 12'3".

Both styles are manufactured in 1 foot increments. All posts are 14 gauge steel. Shelves can be either clipped or nut & bolted to the post.

Box Post Holes 1-1/2" O.C.

Offset Angle Post Holes 1-1/2" O.C.

Rolled Formed Angle Post Holes 1" O.C.

Government Post Holes 1" O.C.

Offset Angle Post Holes 1" O.C.

## Heavy Duty Box Style and Heavy Duty Offset Posts

Heights range from 7'3" to 28'.

Both styles are manufactured in 1 foot increments. All posts are standard 13 gauge (Also available in 12 gauge). Shelves can be either clipped or nut and bolted to the post.

Special sizes available

Special bending for tables and counters available

## NUT & BOLT SHELVING BACK AND SIDE REQUIREMENTS

To make the following heights of units follow the chart below to determine number and dimensions of components.

Shelving Height	# of Backs or Sides	Shelving Height	# of Backs or Sides
5' 3" =	2 Pieces 39"	10' 3" =	3 Pieces 45"
6' 3" =	2 Pieces 39"	11' 3" =	3 Pieces 51"
7' 3" =	2 Pieces 45"	12' 3" =	3 Pieces 51"
8' 3" =	2 Pieces 51"	14' 3" =	4 Pieces 45"
9' 3" =	3 Pieces 39"		

# Tri-Boro Sway Braces, Label Holders, Reinforcements, Shelving Clips & Hardware

## SWAY BRACES

Made of 1" wide hot-rolled 12 gauge steel strip with safety edges. Ends are radiused and punched for attaching to front and rear post.

Model Number	Shelf Size	Wt.
SB18	12"-18"	1.0
SB36	24"-36"	2.0
SB48	42"-48"	3.2

### General side/back & sway brace info:

When supplying open shelving units, one pair of braces for each side/back location may not always be sufficient. The following is our recommended sway brace to unit height chart. Note: Common sides and backs share sway bracing.

Post height up to 7'	<b>1 pair of sway braces</b> for each side/back location
Post height from 8' to 10'	<b>2 pair of sway braces</b> for each side/back location
Post height from 11' to 13'	<b>3 pair of sway braces</b> for each side/back location
Post height from 14' to 16'	<b>4 pair of sway braces</b> for each side/back location

1-1/2" O.C. (COP15)

1" O.C. (COP1)

### CLIPS FOR OFFSET/BOX POSTS

14 gauge (.078 thick) steel zinc plated

Model Number	Wt.
COP15	1 oz.
COP1	1 oz.

## LABEL HOLDERS

Made of cold-rolled steel. Punched on ends for attaching to front edge of shelves. The top and bottom edges are folded over to accommodate labels approximately 1" high.

Model Number	Size	Wt.
LH24	24"	.2
LH30	30"	.3
LH36	36"	.4
LH42	42"	.5
LH48	48"	.6

NOTE: Welded Label Holders Available for flange shelves only.

## REINFORCEMENTS

A 1" x 1" angle made of 12 gauge steel used to reinforce front and /or back of shelf.

Model Number	Size	Wt.
RB18	18"	.7
RB21	21"	1.0
RB24	24"	1.4
RB30	30"	1.7
RB36	36"	2.0
RB42	42"	2.4
RB48	48"	2.7

## ROUNDHEAD BOLTS WITH HEX NUTS

(Sold in boxes of 100)

Model Number	Size	Quantity	Wt.
HB63	1/4" x 5/8"	100	2
HB100	1/4" X 1"	100	2.5
HB125	1/4" X 1-1/4"	100	3

# Tri-Boro Angle Sways & Splices

## ANGLE SWAYS (For 1" on Center Offset and Nut & Bolt Shelving)

A 5" x 5" L-shaped bracket that is made of 11 gauge steel with holes punched 2" on center. Gives 5 points of fastening between shelf and upright to prevent lateral movement when sway bracing is not used.

Model Number	Size	Wt.
AN55	5" x 5"	.02

## OFFSET ANGLE SWAYS (For 1-1/2" on Center Shelving)

A 5" x 5" L-shaped bracket made of 11 gauge steel with one leg punched on 2" centers and the other punched 1-1/2" on center. Gives 5 points of fastening between shelf and upright to prevent lateral movement when sway bracing is not used.

Model Number	Size	Wt.
OAS55	5" x 5"	.2

## SPLICE (For Rolled Formed Post)

Made of hot-rolled 12 gauge steel. Punched 2" on center for the joining of two roll form posts. Dimensions of splice are 1" x 1" x 7".

Model Number	Wt.
SP 117	.32

## OFFSET SPLICE

Made from cold-rolled 12 gauge steel. Punched on 1-1/2" and 1" on centers from either end for the joining of two offset posts. Dimensions of splice are 3/4" x 1" x 5".

Model Number	Wt.
OSP115	.18
OSP1	.18

1-1/2" O.C.

1" O.C.

## BOX POST SPLICE

Made from cold-rolled 12 gauge steel. Punched on 1-1/2" and 1" on centers from either end for the joining of two box posts.

Model Number	Wt.	Dimensions
OSP 115	0.2	4.5" x 1.775"
OSP 1	0.2	5.5" x 1.775"

## HEAVY DUTY OFFSET POST SPLICE

Made from cold-rolled 12 gauge steel. Punched on 1" on centers from either end for the joining of two heavy duty offset posts.

Model Number	Wt.	Dimensions
HDOSP 1	0.4	7" x 1.875" x 1.223"

## HEAVY DUTY BOX POST SPLICE

Made from cold-rolled 12 gauge steel. Punched on 1" on centers from either end for the joining of two heavy duty box posts.

Model Number	Wt.	Dimensions
HDBSP 1	0.4	7.5" x 1.775"

# Tri-Boro Shelving Bin Fronts

## BIN FRONTS (Nut and Bolt Shelving)

Made of cold rolled  
18 gauge steel.

Top edge is formed into a  
hem. Bottom is flanged to  
rest on shelf and punched  
to provide means of  
attaching to post.

Model Number	Size H x W	Wt.
BF224	2" x 24"	.9
BF230	2" x 30"	1.2
BF236	2" x 36"	1.4
BF242	2" x 42"	1.6
BF248	2" x 48"	1.8
BF424	4" x 24"	1.6

# Tri-Boro Sturdi-Frame™ Steel Shelving - Offset Post Type

The special top and bottom shelves eliminate the need for back and side braces on these shelving units. Top and bottom shelves are nut and bolted into place. Intermediate shelves are clipped into place with Tri-Boro's 13 GA. compression clips. The loading of shelves further increases the locking action of the clips.

**Note: Nut and Bolt type post and additional intermediate shelves also available upon request.**

AS3342	33" x 42"	17.6	24.4

## DIE RACK SHELVING

This heavy duty shelving is perfect for storing dies, large automotive parts or any other heavy or large items. The unit is composed of five shelves constructed of 14 gauge steel with a welded in channel stiffener for added strength. The posts are 2" x 2", 12 gauge angles with punching for 1" shelf adjustment. Units have a standard gray baked-on enamel finish. Units are available in heights from 72" to 120". All shelves have a capacity of 1600 lbs.

# Slotted Angle

## Easy to use, easy to build

Tri-Boro slotted angle helps you build an efficient framing system for a variety of uses from machine guards to hand rails. Slotted Angle is the most versatile, time and cost effective construction material available for building carts, ladders, benches, shelving, cases, racks or any other type of structure. Made of either 12 or 14 gauge roll-formed steel. Slotted Angle is finished in Gray Powder Coat Enamel or corrosion resistant galvanized finish.

### Easy to use... Just measure, cut and bolt together.

- Scientifically designed pattern of holes and slots are perfectly positioned for bolting pieces together at various angles without needing to drill holes.
- No special tools required but our slotted angle cutter cuts completely through with one fast easy stroke.
- Prime, cold rolled steel with painted or hot dipped, rust-resistant, galvanized finish.
- Available in 96", 120" and 144" lengths in 14 gauge and 12 gauge steel.
- 100% reusable. Even short pieces of angle can be used as a cleat to join together angle lengths into longer ones.
- Old outmoded structures can be unbolted and reassembled into new ones.

**The Ideal Material to Build Carts, Scaffolds, Benches, Platforms, Framing and So Much More in an Economical Way.**

## Slotted Angle Accessories

### Gusset Plates

- Galvanized steel corner plates give added rigidity and strength.
- 14 gauge cold rolled steel measures 6" x 6"

### Nuts and Bolts

- Zinc-plated 5/16" x 5/8" Hex head bolts and nuts available in boxes of 75 each

### Casters

- Use heavy duty casters with slotted angle to make special trucks and carts
- Made from Poly-O polyurethane material
- Available as swivel, swivel with brake and rigid
- 5" x 1-1/4" casters are rated at 250 pounds each

Model Number	Size	Wt.
CS (Swivel Caster)	5" x 1-1/4"	2.0
CSL (Swivel Caster w/Side Brake)	5" x 1-1/4"	2.0
CR (Rigid Caster)	5" x 1-1/4"	2.0

## Slotted Angle Cutter

- Cuts all slotted angle sizes, burr free in one fast operation
- Cuts any pieces to length including short pieces to be used for cleats
- Cuts both sides of the L shape in one operation.
- Long 36" and 42" handles provide lots of leverage

# Slotted Angle Components & Specifications

## 14 Gauge – For Average Jobs

Cold-rolled high strength steel – recommended when extreme loads are not required

- Nominal size 1-1/2" x 1-1/2" and 1-1/2" x 2-1/2"
- Available in 8', 10' and 12' lengths, painted or galvanized

Painted Model No.	Galvanized Model No.	Gauge	Size	Pieces Per Bundle
SA15158	SA15158GAL	14	1-1/2" x 1-1/2" x 8'	10
SA151510	SA151510GAL	14	1-1/2" x 1-1/2" x 10'	10
SA151512	SA151512GAL	14	1-1/2" x 1-1/2" x 12'	10
SA25158	SA25158GAL	14	1-1/2" x 2-1/2" x 8'	10

SA251512	SA251512GAL	14	1-1/2" x 2-1/2" x 12'	10

## 12 Gauge – For Heavy Duty Jobs

Heavier weight cold-rolled high strength steel – recommended for use when greater strength and carrying capacity is required

- Nominal size 3" x 1 1/2"
- Available in 8', 10' and 12' lengths, painted or galvanized

Painted Model No.	Galvanized Model No.	Gauge	Size	Pieces Per Bundle
SA30158	SA30158GAL	12	1-1/2" x 3" x 8'	10

# Tri-Boro Bin Divider Units

## GENERAL FEATURES AND BENEFITS

- Three Heights: 39", 75" and 87"
- Three Depths: 12", 18" and 24"
- Clip Type or Nut & Bolt Type Available
- Label Holders and Bin Fronts Optional
- 20 and 18 Gauge Shelves Available
- Assembly Services Available

## TRI-BORO BIN DIVIDER UNITS BUILT TO LAST, DESIGNED TO BE USED.

When you need durable, convenient storage for small parts or supplies do what so many other facilities have done. These storage centers are found everywhere... service areas, parts departments, tool rooms, shipping rooms, warehouses, and assembly areas. The units provide easy and free access to all components and allow quick visual inspection of their contents.

Sturdy 20 gauge perforated flange shelves are reinforced by dividers that feature safety hemmed edges to avoid injury during retrieval of the bin contents. Rugged 14 gauge upright posts, punched on 1" centers, support a heavy load of small parts. The dividers can be moved, added to or removed at any time to accommodate changing storage needs.

Closed back and side panels keep the contents where they belong... on the shelf.

They provide additional rigidity, durability and security to the bin units. Bin divider modules can be used individually or in continuous configurations. Select from popular standard styles and sizes or have Tri-Boro custom design units to meet your very specific needs.

- ***Bin divider units feature base plates to create a finished look, and prevent small items, litter and debris from collecting underneath the unit.***
- ***Units shipped K.D. to save freight... assemble easily and quickly with Shelf Clips and Divider Clips. (Comes complete with all components ready for assembly.)***

Assembly Available

# 39" High Bin Divider Units

## Ideal for bench or table top applications

Tri-Boro Bin Divider Units are manufactured in a wide range of sizes. The shelf is a perforated flange type shelf with each side having a triple bend for added strength. The bin divider units are available in 12", 18" or 24" depths, in 1" O.C.

Units are available in clip or nut and bolt type.

All Tri-Boro steel components receive a rust resistant phosphatized cleaning for better paint adhesion and durability. A custom, quality blended powder coat paint is applied "Electro-Statically" and then baked on in a continuous curing oven for lasting durability and outstanding appearance.

## Our Bin Divider Units Are Also Available In Custom Configurations

Although our broad range of stock products will provide solutions for nearly every bin application, there might be special instances where a little modification may make a substantial difference in day-to-day suitability.

We have the components necessary for many custom configurations. We also have a knowledgeable staff ready to assist you, our customer, in determining the best solution for your application.

Whether you need bin units or work benches you can depend on Tri-Boro for quality products, affordable pricing and fast turn-around times on any order.

## Shelf Drawer Units

If you're having problems storing small parts, then Tri-Boro has the solution. Our shelf drawer units allow for easy access to the smallest of parts. Each drawer may be sub-divided into compartments as small as 1". Drawers have built-in handles and label holders for ease of use. Unit is finished in gray. Nine other colors available for a small additional charge.

# Tri-Boro's Steel Top Work Bench

**STYLE A**

**STYLE B**

**STYLE C**

**STYLE D**

## The Steel Work Surface

Tri-Boro presents the toughest work bench in the industry today. Steel top work bench stands up to the daily rigors of hard industrial use. Delivers maximum performance in maintenance rooms, assembly areas, or repair shops. Heavy gauge 1 3/4" thick steel construction ensures extra durability. Easily maintained and cleaned.

## Bench Features

- Legs feature double electrical knock outs front and rear.
- Available in either adjustable or flared leg models.
- All steel components receive a three stage Pre-Treatment Process for increased durability of the hard baked enamel finish.
- Style D work bench features a smooth gliding fully enclosed steel case drawer.

LS72	72"	12"	27.0

# Tri-Boro's Shop Desks and Work Tables

## Shop Desks

Tri-Boro offers a superior line of shop desks. These sturdy desks were designed with daily use in mind – they'll help keep you organized and also offer convenient and secure storage. Our shop desks are ideal for shippers, checkers, dispatchers, mail rooms and receiving departments. The writing surface is sloped and smooth.

The three compartment work organizer is perfect for convenient access to supplies or documents. The center drawer glides smoothly on nylon rollers and has a built in grooved key-lock for security. The full size drawer measures 24"w x 27-14"d x 3-1/2"h. Each desk is manufactured from high grade steel and receives a three stage Pre-Treatment Process for added durability of the hard baked enamel finish.

### Cabinet Style Shop Desk

- Provides extra storage capacity and security.
- Double swinging doors feature 3-point locking device and durable handle.
- Includes 2 full lower shelves.
- Storage cabinet outside dimensions are 29"d x 34"w x 28-3/8"h. Opening with door frame measures 30-14"w x 27"h.

Catalog No.	Size D x W x H	Wt. (lbs)
SD3035-CS	30" x 34-1/2" x 53"	147

### Open Style Shop Desk

- Bottom shelf is recessed for extra leg room.
- Free standing unit.

Catalog No.	Size D x W x H	Wt. (lbs)
SD3035-OS	30" x 34-1/2" x 53"	94

# Rivet-Rak Steel Shelving

Tri-Boro delivers both ease of assembly and unobstructed access with RIVET-RAK. It is available in the widest range of sizes in the industry, and unlimited combinations that can satisfy a variety of requirements.

## Performance Features:

- Wide span capability
- Boltless, clipless construction
- Assembles in minutes
- Rivets lock into keyholes for added stability
- All components are powder coated
- Shelf sizes up to 48" x 96"
- Standard heights to 22' available
- Shelves are adjustable on 1-1/2" centers
- Various sizes and shelf capacities
- Custom configurations available
- Particle board shelves and wire decking available

## Order Specifications:

RIVET-RAK storage units are made up of posts, side-to-side beams and front-to-back beams. There are certain minimum requirements for beam use to ensure structural stability and safety. For example: all units must have 4 double rivet beams at top and bottom for stability. (2 side-to-side and 2 front-to-back, or full perimeter)

Follow these guidelines when specifying components:

- All units require a full perimeter of double rivet beams at top and bottom of unit.
- Single Rivet Light Beam (RBL) units 24" deep or less:
  - do not require single rivet beams front-to-back at each intermediate level in the unit.
  - 6' - 8' high must have one single rivet beam intermediate level front-to-back, located approximately in the middle of the unit.
  - 9' - 10' high must have two single rivet beam intermediate levels front-to-back, located to divide the height into 3 equal parts.
  - 11' - 16' high must have three intermediate levels; a full perimeter of double rivet beams in the middle plus intermediate levels of front-to-back single rivet beams in the upper and lower halves of unit.
- Single Rivet Light Beam (RBL) units 30" deep or greater:
  - All units must have single rivet beams front-to-back at every intermediate level: units 11' - 16' must have single rivet beams front-to-back at every intermediate level PLUS a full perimeter level of double rivet beams located approximately in the middle of the unit.
- Double Rivet Angle Beams and Double Rivet Channel Beams must have front-to-back beams at each beam level to provide decking support and ensure stability. When using Double Rivet Channel Beams from side-to-side, Double Rivet Angle Beams must be used from front-to-back.
- Rivet Tie Plates are recommended to tie adjacent angle post units together and to ensure structural stability. Tie plates should be used at the top and bottom of adjacent posts with additional tie plates spaced no more than 48" apart. Tie plates are not used on units with T posts.

**4 Rivet Angle Posts with a full perimeter of Double Rivet Angle beams top & bottom and Single Rivet Angle beams at intermediate levels - with particle board shelving.**

**4 Heavy Rivet Angle Posts with Double Rivet Angle beams at all levels - with particle board shelving**

## Planning Chart

Unit growth must be considered when designing a shelving layout. The actual outside dimensions of units are 1/2" greater than the nominal shelf size. A clearance of 1/4" must be left between units.

# Rivet-Rak Pre-Configured Units

## SPACEMASTER Rivet-Rak

**Spacemaster Rivet-Rak is best suited for light and medium applications**

Double Rivet Beam on top and bottom provide stability. Single Rivet Beams provide maximum vertical space on intermediate levels. Shelf sizes up to 36" x 48". Shelves adjust on 1-1/2" centers.

Double entry access as no diagonal brace is required. Boltless, clipless construction assembles in minutes.

# Specialty Rivet-Rak

**Specialty Rivet-Rak Units are preconfigured, easy to assemble, strong and durable.**

These units are constructed with boltless rivet-rak components. Units are designed for a wide variety of applications. Horizontal surfaces are generally created with particle board. Because they are built from Tri-Boro Rivet-Rak components these units require no sway bracing allowing easy access. All shelves are adjustable on 1-1/2" centers and are simple to assemble and flexible.

**Used In Many Applications:**

- **Industrial • Office • Commercial Record Storage**
- **Warehouse • Work Stations**

Select from our standard units and sizes, or have Tri-Boro custom design units to meet your specific needs. Particle board is the standard top surface for these specialty racks, however they can be outfitted with other surfaces. Contact us for further information.

**Tire Rack**  
Specialized sloped shelves hold tires firmly on rack. Tire rack can be bolted to wall for additional stability. Row supports available for back to back rows.

**Model Number** TR126084  
**Size D x W x H** 12" x 60" x 84"

**Rivet Wall Support**  
RWS(length in inches) -L or -R  
**Example: RWS12-L**  
Available lengths:  
9", 12", 18", 24"

**Work Center**  
**Model Number** WC309836  
**Size D x W x H** 30" x 98" x 36"

**Packaging Bench**  
**Model Number** PB367236  
**Size D x W x H** 36" x 72" x 36"

**Tire Rack Accessories:**

**Rivet-Rak Muffer Holder**  
**Model Number:** RRMUFFH  
**Size:** 12"D X 36"W

**Rivet-Rak Belt Holder**  
**Model Number:** RRBELTH  
**Size:** 18"D X 12"W

**Record Storage**  
**Model Number** RS326984  
**Size D x W x H** 32" x 69" x 84"

**Record Storage**  
**Model Number** RS164284  
**Size D x W x H** 16" x 42" x 84"

**Office Unit**  
**Model Number** OF183684  
**Size D x W x H** 18" x 36" x 84"

# Solid Deck / Perf Deck\* for Rivet-Rak™ and Pallet Rack

## Perf Deck

- A great alternative to wire deck
- Product slides on & off easily
- Totally flat and smooth storage surface
- Open space shelves for air and sprinkler water flow
- Perf Deck panels drop into the step\* on pallet rack beams
- Rivet-Rak shelving panels drop easily into Rivet-Rak beams
- Can be used with Tri-Boro solid steel deck
- A choice of finishes and opening styles is available

Deck panels come in powder coated standard gray.  
Other colors available at additional charge.

\*Perf Deck is designed for use with Tri-Boro brand pallet rack or Rivet-Rak™.

Please consult with Customer Service to check compatability if you intend to use it with another rack brand.

# Roll Formed Pallet Rack

Obtain warehouse racking and shelving products on one order from ONE SOURCE - Tri-Boro Storage Products.

We manufacture our own roll-formed pallet rack to the same standards of quality and performance you've come to expect from our other storage products. Tri-Boro now offers the added value and logistical advantage of single source integration for all your warehousing and storage needs.

- **One Source for Industrial Steel Shelving and Warehouse Rack**
- **Quick Ship Program**
- **100% USA Made**

## Features & Benefits

Single Rib Column Design:	Adds to strength and rigidity.
Tapered Keyhole Slots:	Pulls beam against frame for maximum stability.
Return bends on all open-back design frame members:	No sharp exposed edges - Adds to strength and rigidity.
Interchangeable product design:	TRI-BORO rack is compatible with most "teardrop" design pallet racks.
One-piece tube seamed step beams:	No exposed welds, which can cause pallet hang-ups. Safer for retail applications.
High strength tapered studs on beam connector plates:	Extra safe connection and snug fit. Less stress on components than slot and hook connections.
Integral beam connector safety locks:	Self-engaging design is secure, easy to use and allows for quick repositioning of beams. Factory installed - replaceable.
Quick & Easy Assembly:	Saves time and money. No loose hardware.
 Powder coat baked finish:	Durable, scratch resistant high gloss finish. Ideal for many food and industrial corrosive applications.
Full range of capacities and sizes from hand-loaded bulk rack to your heaviest applications:	One source for all your storage needs. Complete turn-key services available through a qualified network of full line material handling distributors.
Stock rack for immediate requirements:	Warehouses and stocking dealers around the country with a large selection of popular size racks.
Factory Support:	Large enough to handle any size job. Small enough for the personal services that most companies cannot provide.

## Notes:

- Based on RMI 2019 Specification for the Design, Testing and Utilization of Industrial Steel Storage Racks.
- "Spacing" is distance from floor to top of first beam level. If maximum opening is not floor level, "Spacing" is distance from top of beam to top of beam + 1".
- Applicable for non-seismic use only. Building codes may require otherwise.
- Capacities are for frame components only. Overall rack system configuration is the responsibility of others.
- Contact your Tri-Boro representative for design assistance or for applications not covered by above.
- Where the bottom portion of frames are exposed to potential minor impacts from forklift trucks or moving equipment, consideration should be given to purchasing one of the optional impact protection devices. Ask your Tri-Boro representative for a recommendation.
- \*F14 Frame capacity: 4,000 lbs. max per beam level.

SPECIAL ORDER ITEMS -  
MINIMUM RUN  
REQUIREMENTS APPLY.  
Please contact your Tri-Boro  
representative for more  
information.

144"					2303	3038	4120	6511	8482

## Notes:

- Based on RMI 2019 Specification for the Design, Testing and Utilization of Industrial Steel Storage Racks.
- Load Capacities are based on uniformly distributed product load per pair of beams.
- Deflection is based on product load only, and is limited to L(span)/180.
- Spans from 48" to 80" designed for 25% impact from placing 1 load per shelf.
- Spans from 82" to 120" designed for 25% impact from placing 1 of 2 loads per shelf.
- Spans from 122" to 144" designed for 25% impact from placing 1 of 3 loads per shelf.
- Applicable for non-seismic use only. Building codes may require otherwise.
- Capacities are for beam components only. Overall rack system configuration is the responsibility of others.
- Contact your Tri-Boro representative for design assistance or for applications not covered by above.

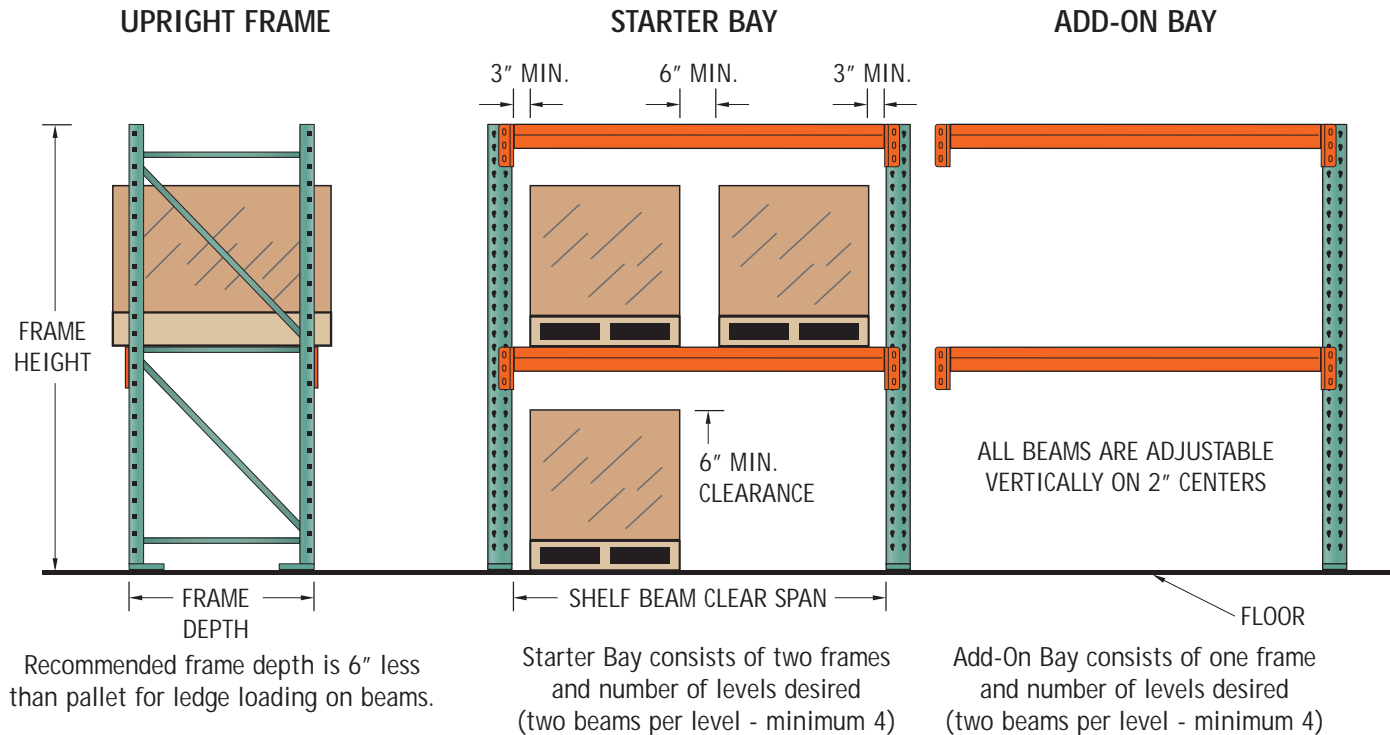

### ROLL-FORMED STEP BEAM PART NUMBER (EXAMPLE: 4 1/8" x 96")

SB	4125	96
ROLL- FORMED STEP BEAM	HEIGHT IN INCHES	LENGTH IN INCHES

# How To Order

**BEAM LENGTH:** SHELF LENGTH EQUALS THE DISTANCE BETWEEN UPRIGHTS. IT IS DETERMINED BY ADDING THE WIDTHS OF PALLET LOADS PLUS A 3" SIDE CLEARANCE BETWEEN UPRIGHT AND PALLET AND 6" BETWEEN PALLET LOADS. SHELF BEAM CAPACITIES ARE BASED ON A PAIR OF BEAMS SUPPORTING AN EVENLY DISTRIBUTED LOAD.

**RACK HEIGHT:** ADD THE FOLLOWING FIGURES:

- HEIGHT OF PALLET LOADS (INCLUDING PALLET)
- + HEIGHT OF SHELF BEAM
- + 6" MINIMUM VERTICAL CLEARANCE FOR EACH PALLET LOAD

SUM OF ABOVE DIMENSIONS = RACK HEIGHT

FOR UPPERMOST LOAD LEVEL, LOCATION OF SHELF BEAM SHOULD BE 6" LESS THAN FORK TRUCK'S MAXIMUM LIFT HEIGHT. TOP OF BEAMS NEED TO BE AT 2" INCREMENTS.

## Important Information

Tri-Boro Storage Products (manufacturer of pallet rack) is a member of the Rack Manufacturers Institute of the USA.

Tri-Boro Storage Products fully endorses the 'Specification for Design, Testing, and Utilization of Industrial Steel Storage Racks - ANSI MH16.1-2012 (R2019)'. Tri-Boro Storage Products requires all of its equipment be used within the parameters of the above stated specification. It is the responsibility of any user of this document to ensure that their unique and specific design application corresponds in the first instance to this Specification, then also to any other local or national codes and/or regulations that may be applicable. The descriptive guidelines offered at various points in this document are just that, guidelines; and are only offered as a starting point for general education of any user of this document. Any user applying these guidelines without reference to both the Specification and full knowledge of the individual application, national/local codes, and all applicable regulations, do so at their own risk.

# Specifying a Pallet Rack Installation

*\*Please First see  
"Important Information"  
on first page.*

**Step 1.** Find out everything there is to know about the item you are handling/storing. Find out the three-dimensional size and weight of every load and pallet. Remember, the pallet may not be exactly the same size as the load, there may be overhang one way or the other. Also, be careful to ask about the quality of the bottom of the pallets and whether or not they are capable of resting on beams alone. If they are broken or rotted, they might require wire decking to safely support them.

**Step 2.** Find out everything there is to know about the area that the rack is going to be installed. Start with the physical dimensions of the available space. Next the floor condition, its load bearing capacity, and any slope. Find out about the available clear headroom and the presence of any overhead or other obstructions. Find out if there are any access ways that the rack must not obstruct. Column centerlines and size are also important for flue space specifications and layout information.

**Step 3.** Find out the method to be used for storing and retrieving loads in the rack (most often a fork truck). Can it carry the proposed load? What is its width and right angle turn dimension? What is its maximum lift height? Remember, you must subtract from this number, usually 6", for most pallets to be lifted clear of the beam. Take note of anything else that might impede on its safe interaction with the rack.

**Step 4.** At this point, it is recommended that a sketch be made of each individual bay, no matter how small the job.

**Step 5.** Select the beam. First decide how many loads should be on each beam level. The length of the beam can be determined by adding three inches to either side of the pallet (or load, whichever is largest) and multiplying by all the loads on the beam. For example, a load/pallet of 42" width, two to a beam =  $42" + 3" + 3"$ , multiply by 2 and this comes to a 96" beam. The 3" additions are to give adequate side clearance for loading and unloading. The model of beam should then be selected from the 'Beam Capacity Chart', making sure that the loads do not exceed the maximum capacity. If the beams are longer than 120", they should be tied across the middle to prevent beam spread. If loose decking is to be used, any pair of beams over 90" in length should be tied across the middle for the same reason.

**Step 6.** Figure out how many beam levels you will have in any bay. Are the first pallets/loads going to sit on the floor or on a set of beams? To calculate the number of levels, add together the pallet and load height plus 6" for clearance. Add the face/height of the beam you just selected for the overall total. Fit as many levels as possible in the height available remembering to make sure the fork truck is able to lift the pallet off the top beam with its maximum fork height capabilities. It usually needs an additional 6 – 8" of lift height over the top beam. Finally, make sure there is enough clearance for any sprinkler requirements.

Figure 1.

Figure 2.

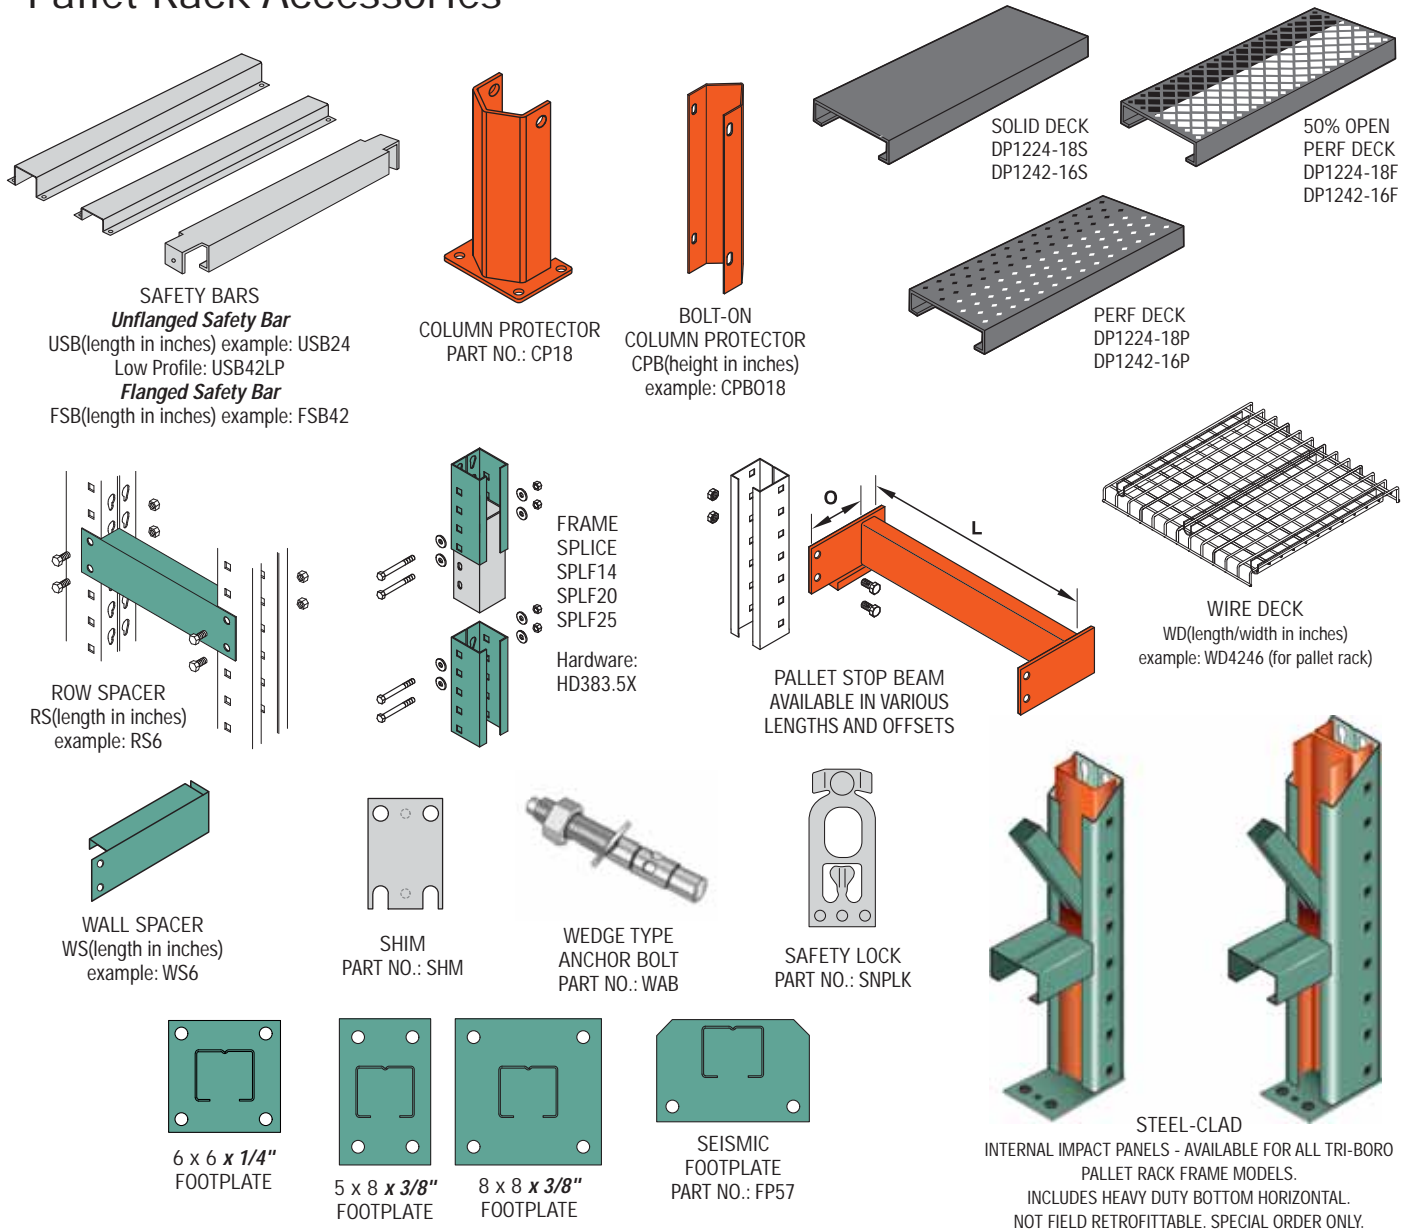

## Specifying a Pallet Rack Installation *continued*

Generally, Pallet rack installations are structurally engineered systems that carry heavy loads. The steps on the previous pages give a guideline for the safe specification of components for simple cases where conditions are perfect. They are written with regard to RMI 2019 which is the guiding industry specification at time of publication. If, in the future, this specification is revised or overridden or, if you have any doubt or confusion whatsoever about any of the steps above, please contact your Tri-Boro representative for assistance.

Finally, please remember that your system should be shimmed level and anchored to the floor (one anchor per leg).
