## Slotted Angle Easy to use, easy to build

Tri-Boro slotted angle helps you build an efficient framing system for a variety of uses from machine guards to hand rails. Slotted Angle is the most versatile, time and cost effective construction material available for building carts, ladders, benches, shelving, cases, racks or any other type of structure. Made of either 12 or 14 gauge roll-formed steel. Slotted Angle is finished in Gray Powder Coat Enamel or corrosion resistant galvanized finish.

## Easy to use... Just measure, cut and bolt together.

- Scientifically designed pattern of holes and slots are perfectly positioned for bolting pieces together at various angles without needing to drill holes.
- No special tools required but our slotted angle cutter cuts completely through with one fast easy stroke.
- Prime, cold rolled steel with painted or hot dipped, rust-resistant, galvanized finish.
- Available in $96 ", 120$ " and 144 " lengths in 14 gauge and 12 gauge steel.
- $100 \%$ reusable. Even short pieces of angle can be used as a cleat to join together angle lengths into longer ones.
- Old outmoded structures can be unbolted and reassembled into new ones.

## The Ideal Material to Build Carts, Scaffolds, Benches, Platforms, Framing and So Much More in an Economical Way.

## Slotted Angle Accessories

## Gusset Plates

- Galvanized steel corner plates give added rigidity and strength.
- 14 gauge cold rolled steel measures 6" x $6^{\prime \prime}$
- 10 pieces per package

## Nuts and Bolts

- Zinc-plated 3/8" - $16 \times 3 / 4$ " Hex head bolts and nuts available in boxes of 75 each

## Casters

- Use heavy duty casters with slotted angle to make specal trucks and carts
- Made from Poly-O polyurethane material
- Available as swivel, swivel with brake and rigid
- $5^{\prime \prime} \times 1-1 / 4$ " casters are rated at 250 pounds each

## Slotted Angle Cutter

- Cuts all slotted angle sizes, burr free in one fast operation
- Cuts any pieces to length including short pieces to be used for cleats
- Cuts both sides of the L shape in one operation.
- Long 36" and 42" handles provide lots of leverage

## Slotted Angle Components \& Specifications

## 14 Gauge - For Average Jobs

Cold-rolled high strength steel - recommended when extreme loads are not required

- Nominal size $1-1 / 2^{\prime \prime} \times 1-1 / 2^{\prime \prime}$ and $1-1 / 2^{\prime \prime} \times 2-1 / 2^{\prime \prime}$
- Available in 8', 10' and 12 ' lengths, painted or galvanized
- Packaged 10 pieces per bundle

| Painted <br> Model No. | Galvanized <br> Model No. | Gauge | Size | Pieces <br> Per Bundle |
| :---: | :---: | :---: | :---: | :---: |

## 12 Gauge - For Heavy Duty Jobs

Heavier weight cold-rolled high strength steel - recommended for use when greater strength and carrying capacity is required

- Nominal size 3" x 1 1/2"
- Available in $8^{\prime}, 10$ ' and 12 ' lengths, painted or galvanized
- Packaged 10 pieces per bundle
